

**ראש הממשלה**  
**PRIME MINISTER**

November 9, 2017

Dear Friends,

I send warm greetings to the Cybertech TLV 2018 Conference.

Israel is the innovation nation, home to thousands of startups founded by some of the world's most brilliant minds. These companies are at the forefront of medicine, telecommunications, cybersecurity and many more fields. They offer critical technologies to developing countries, helping them fight disease and famine, and also play a crucial role in the world's most advanced economies, improving the quality of life and presenting unique solutions to everyday problems.

Cybertech 2018 is an opportunity for entrepreneurs, scientists, businesspeople and political leaders to share ideas and make the necessary connections for further cooperation. By working together, we can more easily and successfully overcome the challenges we face in our rapidly changing world.

Israelis are working hard to remain at the frontier of scientific and technological research. I encourage you to invest in Israel and work with us towards a better future.

I wish you a fruitful and enjoyable event.

Sincerely,

Benjamin Netanyahu
